DETAILED ACTION

Response to Amendment

1. Applicant's arguments with respect to claims 1, 6 and 11 have been considered but are moot in view of the new ground(s) of rejection.
2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-3, 5, 10 and 15, are rejected under 35 U.S.C. 103(a) as being unpatentable over Garfinkle (US Patent 6,370,568) and further in view of Tullis (US Patent 6,535,243).

Regarding claim 1, Garfinkle discloses a communication device comprising:
mail creation means for creating an electronic mail (fig.3).

Art Unit: 2684

Garfinkle fails to disclose detecting means for detecting the current position of the communication device; and attaching information corresponding to the current position with the information being attached thereto.

Tullis discloses detecting means for detecting the current position of the communication device; and attaching information corresponding to the current position with the information being attached thereto (see col.3 lines 19-29 and col.7 lines 51-64). Therefore, It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the system of Garfinkle with the above teaching of Tullis in order to provide the image taken, along with the appropriate GPS stamp, includes with the device for easy of data retrieval.

Regarding claim 2, the modified Garfinkle discloses the device wherein said transmission means comprises:

means for storing regional information specific to areas (see Garfinkle, col.3 lines 9-35); and

means for reading the regional information corresponding to and area including said current position from said storing means and attaching the regional information to the electronic mail (see Garfinkle, fig.3 and col.1 lines 33-40).

Regarding claim 3, the modified Garfinkle discloses storing means stores at least one of scenic images of areas, logo marks of areas, and advertisement images corresponding to areas (see Garfinkle, 212a, 212b, 206 fig.3)

Regarding claims 5, 10 and 15, the modified Garkinkle discloses storing means comprises a rewritable memory and means for writing externally supplied information to said rewritable memory (see Garfinkle, 3 lines 9-50).

5. Claims 6-8 and 11-13, are rejected under 35 U.S.C. 103(a) as being anticipated by Garfinkle and further in view of Tullis.

Regarding claims 6 and 11-13, the modified Garkinkle discloses everything Regarding claim 1. However, the modified Garkinkle does not mention about "a cell station". Official notice is taken that the concept a radio communication system comprising a cell station and a communication terminal are well known in the art. It would have been obvious that a cell station is a wireless transportation medium, which stores, transmits and receives signals to/from radio devices.

Regarding claims 7, the modified Garfinkle discloses the device wherein said transmission means comprises:

means for storing regional information specific to areas (see col.3 lines 9-35);
and

means for reading the regional information corresponding to and area including said current position from said storing means and attaching the regional information to the electronic mail (see fig.3 and col.1 lines 33-40).

Regarding claims 8 and 13, the modified Garfinkle discloses storing means stores at least one of scenic images of areas, logo marks of areas, and advertisement images corresponding to areas (see 212a, 212b, 206 fig.3)

Art Unit: 2684

6. Claims 4, 9 and 14, are rejected under 35 U.S.C. 103(a) as being unpatentable over Garkinkle, in view of Tullis and further in view of Ausems et al. (US Patent 6,434,403)

Regarding claims 4, 9 and 14, the modified Garfinkle fails to disclose storing means comprises a read-only memory.

Ausems et al. disclose storing means comprises a read-only memory (see 315, fig.3). Therefore, It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the system of Garkinkle, Tullis with the above teaching of Ausems et al. in order to stores the operating system software for the device.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tu Nguyen whose telephone number is (703) 305-3427. The examiner can normally be reached on Monday through Friday from 8:30 a.m. to 5:00 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's acting supervisor, MAUNG NAY A, can be reached at (703) 308-7749.
